Allowable Subject Matter

1. Original Claims 1-5, 8-11, 24-27 and 30-34 respectively are renumbered 1-18 respectively. Original Claims 6-7, 12-23 and 28-29 are cancelled.

2. The following is an examiner's statement of reasons for allowance:

The Office has deemed Applicant's latest claim amendments and associated remarks persuasive to overcome the rejection under the applied prior art references with respect to the following amended claim features:

1. In a computer system with a message processor, a method of reprocessing a message from which a portion has been removed after an attempt to previously process the message failed, the method comprising the acts of:

receiving a first message at the computer system that is intended for a particular recipient, wherein the computer system is configured to process messages and log state information to identify each message and the state of the processing of each message in a log, such that upon attempting to process a message, the computer system logs a first indication along with an identifier of the message to indicate that the computer system is attempting to process the message, and upon successfully processing the message, the computer system logs a second indication along with the identifier of the message to indicate that the computer system successfully processed the message;

Art Unit: 2451

attempting to process the first message in order to deliver the first message to the recipient, wherein upon attempting to process the first message, the computer system logs the first indication corresponding to the first message;

subsequent to logging the first indication corresponding to the first message, the computer system failing to process the message such that the computer system does not log the second indication corresponding to the first message;

the computer system accessing the log based on the absence of the second indication, that the message previously failed to process; and

repeatedly attempting to reprocess the first message by first removing a portion of the first message and then attempting to reprocess the first message such that at each attempt to reprocess the first message, a different portion of the first message is removed prior to reprocessing the first message, such that the first message is repeatedly reprocessed until it is successfully processed or until a predefined point at which it is determined that the first message should be deleted rather than reprocessed.

Specifically, Applicants remarks that none of the cited art teaches or suggests repeatedly reprocessing of a message after a portion of the message is removed to allow the message to either be successfully processed or eventually discarded, as recited in claim 1, is found persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
